compassion, care, integrity and faith

Since its founding in 1906 as Athens first hospital, St. Mary's has provided quality care with dignity and compassion to the people of Northeast Georgia. Today, St. Mary's is recognized for advancing healthcare in our community while remaining committed to the values of compassion and sacredness of human life.

St. Mary's Foundation works to improve and enhance the services provided for patients and residents of St. Mary's Health Care System and to ensure these services are available to those who need them most by providing opportunities for giving to the community.
